

KIDS' SCIENCE CHALLENGE

A Free Nationwide Science Competition for 3rd-6th Graders

Lesson plans
Science fair project ideas
Online activities
Videos, games and
lots more!

The first 1000
entrants receive a
free Activity Kit with
hands-on projects related to
this year's science topics;
Zero Waste, Animal Smarts
and Meals on Mars.

How the competition works:

- 1 Kids research three exciting science topics.
- 2 Kids brainstorm their ideas.
- 3 Kids submit their ideas for experiments or problems for scientists to solve. (Kids are only asked to submit their ideas, not to build out the actual experiment.)
- 4 If the idea is chosen, the grand prize winner gets to visit and collaborate with the scientist to see the idea come alive.

Other prizes include science kits, science equipment and cool science toys.

Open for entries October 1, 2011
through February 29, 2012.
